Audit Title: An Audit of the Milwaukee County Transit System's Fare and Data Collection Systems

Audit Report File Number: 09-84

Audit Date: February 2009

Status Report Date: December 2013

Department: MTS/DOT

Number & Recommendation	Deadlines Established		Deadlines Achieved		Implementation Status		Comments
	Yes	No	Yes	No	Completed	Further Action Required	

1. Develop strategies for verifying, on a spot-check basis, key elements of its ridership profile, including the number of rides per week for various weekly pass fare categories, ratios and percentages used for allocating cash receipts, as well as those affecting transfer and free ride estimates. This should involve seeking resources outside of MTS for incorporating sound sampling techniques.

X

Auditee:

Transit has retained the services of IBI Group as a consultant for the fare collection project. The consultant has reviewed the current fare policy and made a recommendation to proceed with a fare collection system that utilizes contactless fare media (smart cards). The consultant is currently developing a specification for that technology and we expect to have a draft copy of the specification by the end of February 2011.

After review and approval of the specification, a request for proposal will be issued and a contract awarded to a qualified vendor in late spring/early summer.

The new system will provide statistical data for all ridership. This data will be used to update the current ridership profile, including rides per pass, ratios for cash receipts, and free ride calculations. Our goal continues to limit driver interaction with the system to the extent possible with available technology.

February 2012 Update:

Meetings to hear vendor presentations were held in December 2011 and as a result of these presentations, a request for modified offers was issued to the respondents. Modified offers were received on January 31, 2012 and are currently being reviewed by the evaluation committee. The goal is to have a Letter of Intent to Award issued by the end of the 1st quarter 2012. The validating fare box and smartcard technology will allow MCTS to collect key elements of its

	5.						

5. Institute a schedule of periodic inventory counts of finished products in the print shop that can be matched against source documents for greater accountability.

X

X

Auditee:

The Print Shop manager has incorporated additional recordkeeping of finished fares to better track fare form production. If it is determined that the Print Shop will continue to be involved with the production or handling of fare forms after the new automated fare collection system is implemented, a procedure will be developed to periodically inventory the finished fare forms against source documents for greater accountability.

February 2012 Update:

The MCTS Accounting Department has developed an audit plan that measures starting paper inventory, tracks finished products through the printing process, and accounts for the scrap sheets that result from the printing process. In addition, scrap stock will be secured in a locked room in the Print Shop and Accounting staff will be present at the time of destruction of the scrap pieces. Comprehensive unannounced audits will continue on a quarterly basis, rotating through all the different fare forms and an audit report will be submitted to the Managing Director.

September 2012 Update:

To date, the MCTS Accounting Department has conducted two audits. The first reviewed the January – August 2012 Monthly Pass production and the second reviewed the production of the Fall 2012 UPASS for Marquette University. Comprehensive unannounced audits will continue on a quarterly basis. A schedule of future audits has been prepared and submitted to the Managing Director.
