DESCRIPTION OF FISCAL EFFECT

In the space below, you must provide the following information. Attach additional pages if necessary.

- A. Briefly describe the nature of the action that is being requested or proposed, and the new or changed conditions that would occur if the request or proposal were adopted.
- B. State the direct costs, savings or anticipated revenues associated with the requested or proposed action in the current budget year and how those were calculated. ¹ If annualized or subsequent year fiscal impacts are substantially different from current year impacts, then those shall be stated as well. In addition, cite any one-time costs associated with the action, the source of any new or additional revenues (e.g. State, Federal, user fee or private donation), the use of contingent funds, and/or the use of budgeted appropriations due to surpluses or change in purpose required to fund the requested action.
- C. Discuss the budgetary impacts associated with the proposed action in the current year. A statement that sufficient funds are budgeted should be justified with information regarding the amount of budgeted appropriations in the relevant account and whether that amount is sufficient to offset the cost of the requested action. If relevant, discussion of budgetary impacts in subsequent years also shall be discussed. Subsequent year fiscal impacts shall be noted for the entire period in which the requested or proposed action would be implemented when it is reasonable to do so (i.e. a five-year lease agreement shall specify the costs/savings for each of the five years in question). Otherwise, impacts associated with the existing and subsequent budget years should be cited.
- D. Describe any assumptions or interpretations that were utilized to provide the information on this form.

A: Granting an Easement to the American Transmission Company (ATC) in order to construct the Mill Road – Granville Transmission Line Project. In order to complete the project, ATC will need to install infrastructure through County-owned land. This project is being constructed to strengthen the regional electric grid, improve reliability, and meet increasing energy demand from customers.

B: Revenue of \$77,974.40 will be realized based on receiving \$1.60 per square foot for the 48,734 square foot easement (48,734 X \$1.60). Staff time will be required for review of the Right of Entry Application, but this review time will be compensated by the application fee.

C: The revenue for the easement will help meet revenue targets for the budget year.

D: None
