<p>Rock Sports Complex Milwaukee County Park Ski Hill Rock snow production heard inside home 10pm -6am. This Milwaukee County park facility disrupted sleep for my entire family all night It is a public nuisance. The well-being of residents & animals within miles of this location is destroyed. Constant mechanical noise all night during all overnight snow production Production should occur 4am-9am What Milwaukee County ski facility adjacent to residential neighborhoods is constantly intrusive with noise for 8 hours overnight? Franklin has no authority to establish standards for this Greendale County park There is ZERO protection for the citizens from ANY noise from this development for ANY activity. PLEASE supply me the decibel readings /reports for the monitors overnight to KerrConsulting@msn.com The West decibel monitor needs to begin recording at 50dBA per the 11-23-2020 City report What is that monitor set to beginning recording at? email the response and action file -2/16 & 2/17, 2023 from 10 p.m.-6 a.m.</p>							
EN23-0059	7044 S BALLPARK DR 744 1007 000	Zoning	03/01/2023	Closed - Merged with o			10/16/2023
<p>Planning Department indicates that if complaints for noise at BPC are not filed than there is NO EXAMINATION into the NOISE. Per the City Planning, an online complaint needs to be filed (not call the police), to create a “trigger” event to which the Planning Department (not the police department) examines to see if it was over 79 decibels for 30 continuous minutes. Also, that the review is not on how loud it is, but that it was for 30 continuous minutes (as noted in County report 2021) . Why would the City allow this? There is no ordinance/code with this standard or procedure Also, the County documents indicate real time, immediate corrective action to the noise. But these complaints, or review of monitors are not reviewed by the Planning Department for numerous days. And there is not been a reply or action to any of the complaints file for this location There is no REAL corrective action This is negligent by the City to enable this pattern to continue for hundreds of events.</p>							
EN23-0065	7044 S BALLPARK DR 744 1007 000	Zoning	03/08/2023	Closed - Merged with o			10/16/2023
<p>Rock Sports Complex BPC and City Hall 9229 West Loomis Road Extra nights not on permit. Planning staff indicated that unless an online complaint is filed there is NO EXAMINATION on how loud or disruptive the sound is at this facility That is unreasonable and disgusting after 9 years of raising concerns about the noise the burden is put on citizens to request protection from this nuisance The Comprehensive Master Plan requires protection of well being of the community Keeping people awake and hearing screaming from a audio loop every 20 seconds is destructive to well being and quiet enjoyment and use of our private homes to even sleep this is for 11 days. The permit for the Halloween event exceeded the permit hours of operation by hours each night. ALL the events including baseball should be examined for noise without citizens having the burden of alerting the City. PLUS there were 42 unpermitted events in 2022. PLUS the 5 extra days for Halloween not on the permit This development violates the permit every year.</p>

<p>UW Panther game heard throughout neighborhood starting with music at 2:20 pm being broadcast over the PA speakers pointed at neighborhood. TURN THE SPEAKERS INTO THE STADIUM. Developer application indicated the following. https://www.franklinwi.gov/Files/Agendas/March2014/CC_Mtg_Packet_Part1_3312014.pdf pgs 53-54 "The public address system proposed for this project UTILIZES TECHNOLOGY TO REDUCE SIGNIFICANTLY, IF NOT ELIMINATE audible DB or noise pollution that may disturb adjacent property owners." THIS is not what was implemented The City has not enforced this. The County documents, presentations required that the “buyer MUST align sound speakers to avoid noise nuisance in the adjacent residential areas” the City is the enforcer of the mitigation. This has not been done for years. Mayor at 8-20-2020 stated the 3 speakers pointed out from the stadium “are a problem for the neighbors” The City is negligent for not doing what is required to mitigate the chronic nuisance</p>

<p>The summer season of The Rock baseball stadium BLASTING noise into my neighborhood began Sunday, May 7, 2023. 1 Around noon UWM Panther game (the sound is loud, but they only announce the current batter). 2 Right after that: loud music began and continued. 3 Late afternoon the loud music turned to blaring , then the Milkman announcer, who never stops talking, began BLASTING the game for the next few hours. I spent this time inside my house, with doors and windows closed, and I could still hear the announcer. The noise this time was even louder than other years 4. On Wednesday, May 10, I arrived home at 4:45 PM to music coming from the stadium, and the Panthers game didn't begin until 6:30. Whatever happened with the 2022 County sound study report?</p>							
EN23-0139	7044 S BALLPARK DR 744 1007 000	Zoning	05/16/2023	Closed - No Violations			05/30/2023
<p>The milkmen stadium has speakers facing out of the stadium and at our neighborhood. It was so loud tonight that my son was woke up in kept awake and then woken up in his bedroom at around 9:00 PM This is a school night and he wakes up at 6:15 AM to get ready for school Our sound ordinance in our neighborhood is about 50db at night starting at the border of our neighborhood. Why is our residential sound ordinance not being enforced? Pleas provide me with the sound monitor readings from the west monitor of the property adjacent to our neighborhood</p>

During the afternoon on the above date the amplified baseball game and attendant noise from the announcers was intolerable I golfed at Whitnall GC with a friend that afternoon and we could clearly hear the announcer at the western-most side of Whitnall park. My friend was shocked. We who live nearer to the Rock, of course, were not shocked at the extreme amplification that day and during all Milkmen ballgames. I only ask the city fathers to establish noise limits and/or enforce existing noise ordinances.

<p>The City is negligent in protecting citizens from this nuisance. It has been loud every day of the Milkman games. EVERY DAY since 2019. It does not "harm" the business to turn it down In fact more people may attend if not alienated by the noise There are hundreds of people that could walk to this facility if this development was a good neighbor instead of a nuisance 12 of the UW Panther home games were NOT loud in 2022, also true for 2019-2022. The announcer and music could not be heard in this neighborhood for most of the season. So clearly the stadium is able to function well for another baseball team without it being loud and disruptive for miles. The UW home panther games 2019-2023 need to be examined for noise level in contrast to the Milkman games Which can be heard for miles. May 17, 2022 I could hear the Milkman event CLEARLY word for word between 8-50 and 9:10pm in Menards parking lot 2 1/2 miles away. The Oconomowoc stadium is not loud outside the stadium facility.</p>							
EN23-0204	7044 S BALLPARK DR 744 1007 000	Zoning	06/10/2023	Closed - Merged with o			06/21/2023
<p>There was incredibly loud announcements, shouting, animal sounds, music, speech, and noise coming from Franklin Field and, according to police, a band playing music from 6:00 PM until 10:30 PM. It was audible in our yard and inside our home.</p>

<p>The PA system / announcer started talking at 3.50 pm heard clearly in the Hawthorne neighborhood for ½ mile or more outside property The noise continued until 10:10 pm the fireworks have the PA system broadcasting music throughout all fireworks events, every event. The applications for the fireworks events (9 and now another application for another event) indicate “no sound amplification will be used for this event” Listen to the recordings for the firework events They play music during the entire fireworks event and after Check the monitor recordings for any of the fireworks events If the recordings are even working after not functioning for a year. How many notices were sent to the developer that they were not working? The planning staff comment that it “takes a long time to repair” during several meetings is egregious and negligent. It has been extremely loud, intrusive and annoying for years without the City doing anything to restrict this nuisance.</p>

The profanity started at 4:10 pm with "come on you MotherF..... clap your hands, that term was used several times throughout this event. It has been extremely loud and disruptive The City of Franklin is negligent for not enforcing the 50 decibels at the property line as presented at the 12-1-2020 Report by Franklin Official. The PDD sound needs to stay on the PDD property, not encroach off the property and be a nuisance to neighbors. Are the several events with rescue personnel being paid for by the Developer? The noise is intolerable, unacceptable and offensive The base / thumping I can feel inside my home over 1/2 mile away. This is a nuisance in violation of all of chapter 178 and also 183-40 Noise Disturbances Prohibited PROHIBITED across a residential property line.

Umbrella Bar - Rock and City of Franklin 9229 W Loomis Live band at umbrella bar was disruptive from 6.30 to 10:30. Lyrics, drums, low frequency noise clearly audible. For example could hear "Don't rock the Boat" song at 9 pm inside my home. Just one example, goes on for hours The "emergency" meeting to discuss the noise issues clearly did not result in a simple request to the live band to maybe turn it down a little given all the media coverage of the issues with noise crossing into surrounding areas. The entitlement of quiet enjoyment for families for miles around this facility was established decades before the City allowed this public nuisance. The noise needs to stay on the property It is the same request we have made since 2013 Properly manage the noise This neighborhood did not apply for or request for decibel levels to be increased, it is something the City inflicted on citizens for miles around development Rock Mr. Adkins month ago said the permanent sound system at the rock was being installed then why so loud?

<p>8:00 pm + I am sitting in my house (7125 S Cambridge Dr.) and for the last hour I have been listening to bass thumping sounds coming from the ROC. Surprisingly, it is very similar to the Taco Tequila night. I should not be able to hear this from within my home When is something going to be done about excessive noise coming from the ROC activities? I would be very willing to have someone come into my home and listen to what I hear. I don't think anyone would find it acceptable. Our homes were here before all of this was approved. Our neighborhood came to the meetings to voice our concerns when all of this development was presented This is what our concerns were No one seems to care. This is not West Allis ,as some like to compare our complaints to, and that we should expect noise if we live by an entertainment facility ROC; Return on Community? I don't think so I am very disappointed that the leadership of Franklin cannot stand up for its residents who live in this area, before the ROC.</p>

<p>midnight to 1.05 am Heard until 1 am Sunday The permitted hours violation of 10/15 after 1 am were undisclosed to CC when voting on another Rock event / entitlement Deceptive to public and elected officials and purposeful No transparency. Event noise, train horn, PA, ominous voice, chainsaws, go past midnight every night. Special treatment pattern repeats, favoritism specifically to the Rock instead of protecting citizens. Citizens asking for 10 years for quality-of-life restoration, standards established when we invested in our homes decades before this noise nuisance. Our home purchase included entitlement to quiet enjoyment. The city has no right to infringe, manipulate, entitle or subsidize the encroachment of harm into our neighborhood So when citizens ask for help, the City response is to cater laws to help the Rock For every night of HHE, check monitors (if working) do the right thing and issue violations AND citations for all the HHE hours and NOISE And Taco Tequila.</p>

<p>5.40-midnight 10/21 HHE past midnight, violation hours & NOISE Special Event Ord 121 "Noise, No Licensee shall permit ANY SOUND to carry unreasonably beyond the boundaries of the special event" Neighbors heard noise trespass far outside premises. Violations for each night are required plus citations by the City to finally enforce / follow laws HHE ran past midnight every night. Neighbors complained, have recordings, check the monitor if it is actually recording: train horn, music, announcer, etc cross the property line Protect public health, safety and welfare and preservation of public peace and order as required Ord 121. Noise is the 2nd most hazardous pollution per the WHO. The City entitles, subsidizes and caters ordinances for further noise nuisance. Shows favoritism to Rock with disregard to surrounding neighbors City has no transparency – to public / officials about the 10/17/23 violations, manipulation to ensure the approval of revising laws to help Rock</p>

<p>6 p m to 1 a m. The loud announcer, the screams, and other loud noises coming from The Hill Has Eyes was ridiculous The noises kept up until well past midnight The constant noise woke my husband and I up a little after midnight. It was different to fall asleep in the first place due to the excessive noise. I don't think it's too much to ask that the volume of the announcer and other sound effects be turned down The residents of Greendale & Franklin were here first. You choose to put you business in the middle of a residential area It's not hard to be a good neighbor It's not hard to considerate of your neighbors Turn down the excessive noise. Let us sleep in our own homes. Stop disturbing our peace & quiet!!!!</p>

<p>8 pm Noise- Once again I hear the music from the ROC and I assume it is from speakers playing music at the Haunted House event Same thing that I had to listen to last weekend. Same complaint I received no response other than my complaint was forwarded. Again, I will request someone to sit in our neighborhood and listen to this Maybe some action would then be taken. We can hear this over our TV volume, which is ridiculous. Please forward this to my alderperson as well. Reports are that the speakers have been turned in towards the property. Obviously, this is a solution that only changes the direction of the sound. It doesn't change the level of the volume/bass. I would appreciate some type of response from someone from the city and included in the response the intended next steps.</p>

<p>The volume of the noise including music, loud bang/explosion sounds and voices over the loud speaker is clearly heard from my house I can hear the words clearly and the music is negatively impacting mental health The extreme noise is hours without a break late into the night. Any assistance is really appreciated, just to see if the volume can be lowered Thank you</p>
