

Proposed 2025-2027 State Biennial Budget Priorities
From the 11.1.24 Advocacy Committee meeting

In order:

1. Increase funding to support paid and family caregivers.
2. Increase funding for aging programs and services and ADRCs.
3. Increase funding for fixed route transit, specialized transportation, and the creation of a regional transit authority.
4. Support for Medicaid expansion that provides health coverage for Wisconsinites at or below 138 percent of the Federal Poverty Line.

Note: budget priorities should highlight that prioritizing racial and health equity lens in distributing funding to all of these areas is crucial.

Upon adoption of the 2025-2027 State Biennial Budget priorities, a letter should be sent to Milwaukee County state legislators outlining the above.
