Sorry that I am not able to attend this meeting. I am a member of the Rights of Nature Wisconsin core team, and thank you for bringing this resolution forward. As an Indigenous 1st Nation person, I believe it's critical to the future seven generations that we act responsibly and quickly on protecting our natural world. While I support your Resolution in general, I do believe some amendments are needed before bringing it to the full County Board. Since you reference my tribe's Resolution 19-52, I hope you consider the specific language in our resolution committing to responsible stewardship to protect the water, earth, environment, wildlife, and animals. Also, that

our waterways possess inherent and legal rights to naturally exist, flourish, regenerate, and evolve free of activities or obstructions that interfere with these rights. In order to make your resolution more meaningful with long lasting benefits, please remove all language that refers to "symbolic" and replace with "legal right". Also, please remove the Fox River and replace with the Kinnikinnick River. The Fox runs through Waukesha County. Thank You for your time and consideration.

I have been asked to submit this:

It is commendable that the Milwaukee County has taken a leadership role in address of global warming, for the protection of nature. This advocacy is crucial for the upcoming generations which will be the primary persons facing life on this planet, intent being that it provides them with sustainable and thriving lives. This strongly calls on us, to the greatest extent possible, to mitigate the threat of global warming and climate change . The Native American community demonstrates the wisdom of making its consequential decisions with forethought of effect on the next seven generations. This respectfully requests that the Milwaukee County Committee on Community, Environment and Economic Development considers and supports the Rights of Nature Resolution.

Regards,

Mary Ross
