Notice of Major Improvement at Wisconsin Avenue and Honey Creek Parkway, Wauwatosa

To the Regional Manager:

Milwaukee County is working in conjunction with US Army Corps of Engineers, Milwaukee Metropolitan Sewerage District and the City of Wauwatosa to undertake major habitat restoration of the Honey Creek segment in the City of Wauwatosa. A part of this restoration will include work removal of utilities adjacent to the Wisconsin Avenue Bridge at Honey Creek Parkway.

While County records do not have a recorded easement with Everstream, the network map available on the Everstream website (snip below) shows a fiber line at the site of the habitat restoration project.

Enter your business address to see how close your service location is to our Business-Only Fiber Network

Please contact me as soon as possible to confirm whether or not Everstream has utility at the location. You may contact me by email at Saji.Villoth@milwaukeecountywi.gov, or at (414) 257-4529. I would like to ensure we have communication and coordination as we move forward with this restoration project. Any utility lines remaining at the location when we commence the project will be considered abandoned, and shall be removed and processed for salvage or disposal as the County deems appropriate.

Sincerely,

Saji Villoth, Contracts Manager Assistant
Milwaukee County Parks
