

MEMORANDUM

T0:

Jean Wolfgang, Milwaukee County, Housing Division

FROM:

Teig Whaley-Smith, Esq.

DATE:

November 8, 2012

RE:

11th & Madison Analysis

The Housing Division of Milwaukee County ("Housing Division") has received an application ("Application") from Movin' Out, Inc. ("Developer") for the 11th & Madison ("Project"). The Housing Division has asked for a review of the Project to determine whether (a) the Project's Construction Budget is Feasible, (b) the Project's Operating Budget is Feasible, (c) whether there is a financial gap on the project, (d) whether the Project meets the Fair Share Test, and (e) whether the Project meets the Subsidy Limit Test.

This memo addresses each of these issues. In preparing this memo, the most recent guidance to participating jurisdictions of the HOME Program was used, *Building HOME: A HOME Program Primer* ("HUD Guidance").¹ The most recent Qualified Allocation Plan ("QAP") for Low Income Housing Tax Credits ("LIHTC") produced by the Wisconsin Housing and Economic Development Authority (WHEDA), was also used.²

Based on the analysis listed below, the Developer's request for \$801,000 of HOME funds is reasonable and the Housing Division must require a minimum of at least 11 HOME Units. The current proposal is for 11 HOME units, which meets the minimum requirement. This analysis is based on reasonable assumptions provided in the attached Application and the attached 11th and Madison Financial Analysis ("Financial Analysis"). All financial assumptions are within a reasonable range and any remaining issues are minor in scope. As required by WHEDA, Developer will make minor adjustments to resolve these

¹ U.S. Department of Housing and Urban Development, *Building HOME: A HOME Program Primer (2010)*, available at http://www.hud.gov/offices/cpd/affordablehousing/training/materials/building/index.cfm (last visited September 10, 2012). Hereinafter referred to as "HUD Guidance."

² Wisconsin Housing and Economic Development Authority, Qualified Allocation Plan 2013-2014 Final Draft, available at

http://www.wheda.com/root/uploadedFiles/Website/LIHTC/Allocating/Draft%20QAP%202013_7%2024%2012.pdf (last visited September 10, 2012).

issues to be consistent with WHEDA's LIHTC application.³ These issues do not significantly or materially impact the feasibility, subsidy limit test, fair share test or other topics covered by this overview. All of these issues would be difficult, if not impossible, to resolve at this stage in project planning and are easily addressed prior to closing.

I. Construction Feasibility

Based on the attached Financial Analysis, the Project's construction budget is feasible and based on reasonable assumptions. Particularly the cost per square foot of \$93.33 is within the acceptable range of \$110 per square foot or less. The overall cost is less than the costs imposed by HUD Section 221(d)(4) which is a WHEDA LIHTC requirement.⁴ The Operating Reserves, Rent Up Reserves, Developer's Fee are all within acceptable ranges.

II. Operating Feasibility (years 1-20)

Based on the attached Financial Analysis, the Project's operating budget is feasible and based on reasonable assumptions. Particularly the operating cost per unit per month of \$432.80 is within the acceptable range of \$400 - \$450 per unit per month. The replacement reserves of \$12,000 per year are also consistent with WHEDA LIHTC requirements. The DCR is within the acceptable range of 1.15 to 1.6 for the entire affordability period of 20 years. Rents are below what is required by WHEDA's LIHTC Program, and the Wisconsin Section 8 requirements. Please note that the rents charged to tenants are substantial, but within LIHTC and Section 8 Limits. A market study, as part of the LIHTC process, will need to be provided to substantiate that tenants can afford the rent.

III. Gap Necessity

The minimum HOME investment is \$1,000 times the number of HOME-assisted units in the Project.⁷ The maximum HOME investment is determined by the 221(d)(3) Test (see section V below).⁸ Based on the Financial Analysis, there is a gap of \$801,163.94 of which the developer is applying for \$801,000 as a HOME grant. This request, based on the Construction and Operating Feasibility analysis above appears

³ Issues that should be addressed with Developer prior to closing are (a) minor adjustments to General Contractor's General Conditions, Overhead and Profit to be consistent with WHEDA's LIHTC program; (b) if additional equity or funding is received, Operating Reserve should be increased from 8 months to 12 months or more, (c) detail of which utilities are paid by project; reasonable assumptions were used to complete, and (d) detail of Marketing/Management Costs and Other Administration & Management Operating Costs should be provided by Developer.

⁵Wisconsin Housing & Economic Development Authority, Wisconsin Standard Multifamily Tax Subsidy Prject Estimated Maximum Income and Rent Limits (Dec. 1 2011), available at

http://www.wheda.com/root/uploadedFiles/Website/Business_Partners/Property_Managers/Other_Reports/201 2 Standard.pdf (last visited September 10, 2012).

⁶ Milwaukee County Section 8 limits were used as provided by Housing Division Staff, dated 10/12.

⁷ HUD Guidance at 2-4.

⁸ HUD Guidance at 2-5.

to be reasonable and is within the minimum and maximum HOME investment requirements. If the County has additional resources it should consider contributing more to help fill the gap.

IV. Fair Share Test

In determining the minimum number of HOME units that the Housing Division must require of the Project, the Housing Division must implement a Fair Share Test. The Fair Share Test equals the Planned Home Investment divided by the Total Eligible Project Costs. This amount should then be multiplied by the Project's total number of units. For this Project the Planned Home Investment is \$801,000 the Total Eligible Project Costs are \$6,101,234, and the Total Number of Project Units is 40. Consequently, the Fair Share Test requires a minimum of 6 Home Units.

V. Subsidy Limit Test / 221(d)(3) Test

In determining the minimum number of HOME units that the Housing Division must require of the Project, the Housing Division must implement a Subsidy Limit Test.¹¹ The Subsidy Limit Test equals the Planned Home Investment divided by the 221(d)(3) Subsidy Limit for each HOME Unit. As of the date of this memo, the 221(d)(3) Subsidy Limits are as follows:

ä	All Wisconsin		Basic Limi	its per No. of l	Bedrooms	
	Participating	0	1.	2	3	4+
	Jurisdictions	\$50,956	\$58,752	\$70.857	\$90.699	\$101.042
i id	HCP=240%	\$122,294	\$141,005	\$170,057	\$217,678	\$242,501

ä	All Wisconsin		Basic Limi	ts per No. of l	Bedrooms	
BVAT	Participating	0	1	2	3	4+
	Jurisdictions	\$53.624	\$61,471	\$74.749	\$96,700	\$106,147
Ha.	HCP=240%	\$128,698	\$147,530	\$179,398	\$232,080	\$254,753

For this Project the Planned Home Investment is \$801,000 and the 221(d)(3) limit for all 11 HOME Units is \$834,980. Consequently, the Subsidy Limit Test yields a percentage of 96%, meaning the Planned

⁹ Although there is reference to the Fair Share Test concept in the HUD Guidance, the clearest definition is included in Montana Department of Commerce, Memo regarding Home Investment Partnerships Program Plan Year 2011 Proposed Changes (October 15, 2010) available at

http://housing.mt.gov/content/HM/docs/HMHOMEHappenings/HMNLtrVol10Issue08.pdf (last visited September 10, 2012).

¹⁰ Marketing/Management and Other Project Administration & Management Costs were excluded until further detail is provided.

¹¹ Supra note 9.

Home Investment is 96% of the maximum allowable. The Housing Division could contribute up to \$834,980 and not be in violation of the Subsidy Limit Test.

HUD requires that the greater of the Fair Share Test or the Subsidy Limit Test be used. In this case, a minimum of 11 HOME Units must be required. This is a minimum and the Housing Division can require more. The current proposal of 11 HOME units meets the required minimum.

VI. Subsidy Layering Analysis

HUD requires a Subsidy Layering Analysis that is based on guidelines produced by the participating jurisdiction, which in this case is the Housing Division.¹² As of the date of this memo, these guidelines have not been produced but the Housing Division staff has engaged a consultant to complete. Although the Subsidy Layering Test can be met if such an analysis has been completed by another funding source, ¹³ as of the date of this memo, such analysis has not been completed. Consequently, this memo uses the minimum requirements set by HUD Notice CPD-98-01. These minimum requirements include a review of the following, all of which were provided in the Application: (a) proposed sources and uses, (b) certification from the applicant whether additional governmental assistance will be provided, ¹⁴ (c) a development budget that includes reasonable costs, and (d) an operating proforma that includes reasonable costs.

CDA has reviewed the documents listed in (a) through (d) above and compared them to WHEDA's LIHTC requirements and other industry standards. Based on this review, the Project includes reasonable costs and other assumptions as indicated in Sections I and II above. Consequently, the Project meets the Subsidy Layering Analysis requirement.

Because the project also includes Market Rate Units, a separate per Unit Subsidy Layering test was applied to confirm that the HOME Units were not over subsidized. This analysis can be found in the "Per Unit Cost Allocation/Subsidy Layering Test" Table included as part of the Financial Analysis.

VII. Other issues

Although not in our scope of review, we have identified the following issues we wanted to make you aware of.

A. <u>LIHTC Structuring</u>. Because the Project is seeking LIHTC, the HOME investment should be structured as a grant to a non-profit partner in the Project. This non-profit partner can then loan the funds to the Project consistent with the requirements of the equity investor and the Project's tax credit attorney. The HOME investment should not be structured as a grant to the Project directly because it will cause problems with the LIHTC investment. The HOME investment should not be structured as a loan because the project has illustrated a sufficient

¹² HUD Guidance at 6-25.

¹³ ld

¹⁴ The HUD Guidance at 6-26 indicates there should be a formal certification. When Housing Division is drafting its guidelines it should require such a certification.

- gap. Even if the loan is repaid from the Project to the non-profit partner, the County should not require repayment because the Project is unlikely to be able to support such a repayment and such a requirement will cause major issues for the non-profit partner and any refinancing of the project.
- B. <u>Match and Other Compliance Issues</u>. This memo only addresses the issues related to the initial award of the HOME funds to this Project, and does not address other issues related to the Housing Division's HOME program, including the requirements of the Housing Division's match towards HOME activities, ¹⁵ monitoring and inspections, ¹⁶ and other compliance issues.
- C. <u>Davis Bacon</u>. HUD requires that Davis-Bacon requirements, including prevailing wage, be include for any projects with 12 or more HOME Units.¹⁷
- D. <u>Ineligible Costs</u>. HOME Funds may not be used to provide project reserve accounts, except for initial operating deficit reserves.¹⁸ Consequently, the Operating Reserve listed in the Project's Application and any Rent-Up Reserve are eligible. The Housing Division's agreement with the Developer, however, should specify that Operating Reserves may be held by the project after the 18-month period allowed by HUD. Furthermore, it is unlikely that fees paid related to the use of LIHTC are eligible, thus LIHTC fees have been removed from the above calculations.
- E. <u>Affordability Period</u>. Because the HOME investment is for new construction of rental housing, the required affordability period is 20 years, regardless of the amount of the Home investment.¹⁹
- F. <u>Enforcement</u>. The Housing Division must enforce the rent limits and other occupancy requirements through a document recorded with the Register of Deeds, or other mechanism approved by HUD.²⁰
- G. <u>Contingent on receiving LIHTC</u>. Because this Project is so dependent on receiving LIHTC, if the Project does not currently have an allocation, a stipulation on the HOME fund award should be included that allows the Housing Division to rescind the commitment and reallocate the funds if the Project does not receive a LIHTC allocation by June 30, 2013 and does not close with an equity investor by June 30, 2014.

Total Gap	\$ 819,514.50

Disclaimers

This is not a market study. A separate market study would be needed to determine if rents are reasonable. This is not an appraisal. A separate appraisal would be needed to determine projects value. It is too early in the process for County to require a market study, but County should receive a copy prior to closing

2011 LIHTC Appendix G

221 (d) 4 Cost Limits

WHEDA limits total development cost for any one development according to the maximum limit under HUD's 221(d) 4 Mortgage Insurance program, plus an automatic 15% allowance for "Cost Not Attributable to a Dwelling Unit" such as parking areas and community spaces. Public housing authorities are exempt from this if they are the primary applicant and HOPE VI or similar federal funding is a source of funds. This is a threshold item and applications exceeding this standard will be rejected.

l Instructions							
Complete cells enclosed	in a box:]				
WHEDA will use the cost determination. This calc					time of its	review of Application #1 and Application #	2 for this
Applications received wit	h a developme	ent cost exc	eeding the I	maximum ca	alculated ir	n cell G36 will be rejected.
