^Greenfield transport numbers for 2016 include both ALS and BLS Transports.															
^Franklin Dispatch and patients seen numbers for 2017 are high due to the increase in calls (without transport) and addition of another ALS unit.															
^ALS Level Transports Data 2017 is a combination of ePCR/Communication Card/CAD/Vendor ePCR. This may account for variations.															
^ALS/BLS Unit = MED Unit may also be dispatched on BLS level calls and transport BLS level patients															
^Patients Assessed Data is from the ePCR Database and may account for variations due to data input errors															
KEY:															
Dispatch Notifications =	Number of MED Unit radio dispatch notifications to the EMS Communications Center (includes calls later cancelled)														
Dr Consultations =	Number of calls requesting an EMS Communications Center physician for medical direction														
ALS Level Transports =	Number of ALS level of care patient transports														
Patients Assessed =	Number of calls with a patient assessment (patient care record (PCR) is created)
