## 2018 Policy Agenda Released

Today, surrounded by more than 150 n4a members and allies at the 24th annual n4a Aging Policy Briefing and Capitol Hill Day, we released this year's policy agenda!

The **n4a 2018 Policy Priorities: Promote the Health, Security and Well-Being of Older Adults** outline the most critical policy considerations facing Area Agencies on Aging and Title VI Native American aging programs. They reflect where we think our collective advocacy is most needed in 2018 to promote the health, security and well-being of older adults. Please join us as we:

- **Enable Aging at Home and in the Community** by strengthening community options that make it possible to age well and safely.
- **Invest in Cost-Effective Aging Services**, especially OAA Titles III B Supportive Services, III E National Family Caregiver Support Program and VI Grants for Native Americans.
- **Improve Health and Lower Costs Through Community Interventions** and recognize the important role that the Aging Network plays in achieving this goal.

n4a members will receive a hard copy in the coming days, but everyone is welcome to **read the Priorities online**.

The work of advancing the policy agenda has already begun! **Take action now** on FY 2019 funding for key and critical aging programs by visiting our **appropriations campaign page** for easily adaptable tools and helpful tips.
