

## **AFFIRMATIVE ACTION PLAN: 2020-2021**

- Statement of Policies
- Plan Dissemination and Implementation
- Work Force Analysis
- Personnel Activity in Past Year
- Goals/Challenges/Activities
- Monitoring and Updating
- Appendix

## **STATEMENT OF POLICIES**

The following policy statements shall guide the Commission and its staff in all matters relating to equal employment opportunity and affirmative action to achieve a diverse work force:

- A. The Southeastern Wisconsin Regional Planning Commission (SEWRPC) is committed to building a diverse staff for employment and promotion to ensure the highest quality workforce, to reflect human diversity, and improve opportunities for people of color and women. SEWRPC embraces human diversity, and is committed to equal employment opportunity, affirmative action, and eliminating discrimination. This commitment is both a moral imperative consistent with an intellectual community that celebrates individual differences and diversity, as well as a matter of law.
- B. The Commission is committed to the practice of equal opportunity in all personnel matters, including, but not limited to: recruiting, hiring, training, transfer, promotion, demotion, termination, disciplinary actions, compensation, benefits, layoffs, and recall practices.
- C. It is the policy of the Commission not to discriminate against any employee or applicant for employment because of race, creed, sex, age, color, religion, national origin, sexual orientation, marital status, veteran status, military status, or disability.
- D. Employees and applicants will not be subjected to harassment, intimidation, threats, coercion, or discrimination because they have exercised any right protected by law.
- E. The Commission will act to ensure equal employment and advancement opportunities consistent with the foregoing statements of policy and shall strive to achieve levels of female and minority employment at least equal to such levels found in the available workforce in the seven county Region making up the Commission's jurisdictional area.
- F. The Commission shall comply with all State and Federal laws relating to equal employment opportunity and affirmative action.

## **PLAN DISSEMINATION AND IMPLEMENTATION**

### **Staff Responsibilities**

All Commission employees are responsible for supporting the concept of equal employment opportunity and affirmative action and assisting the Commission in meeting its goals.

The Commission's Director of Administration has been assigned the responsibility of administering the Commission's equal employment opportunity policies and attendant action program. Duties in this capacity include the following:

- A. Directing Commission-wide efforts to achieve equal employment opportunities, supervising and coordinating such efforts in all divisions.
- B. Communicating the equal employment opportunity policy to employees, prospective employees, and the general public.
- C. Analyzing the composition of the work force.

- D. Together with other managerial staff, assessing the effectiveness of affirmative action policies and programs, identifying obstacles to achieving employment diversity goals, and developing strategies to overcome those obstacles.
- E. Serving as liaison between the Commission and equal opportunity enforcement agencies.
- F. Serving as liaison between the Commission and women and minority organizations and community action groups.
- G. Updating the Commission affirmative action plan on an annual basis.

### **Plan Dissemination Activities**

The Commission's Director of Administration shall be responsible for the following internal dissemination efforts relative to the affirmative action plan:

- A. The affirmative action plan and attendant equal employment opportunity policies are to be provided to all new employees in hardcopy format. Existing employees will be e-mailed an electronic copy of the affirmative action plan and will be required to acknowledge receipt of the policy using the "read receipt" function available in the e-mail program. In addition, the current version of the affirmative action plan is to be maintained on the Commission's intranet site which is accessible to all employees.
- B. On an annual basis, a copy of the updated affirmative action plan is to be provided to all management staff accompanied by a memorandum re-emphasizing the importance of taking actions toward the advancement of Commission goals in terms of staff diversity.
- C. Ensure that an equal employment opportunity poster is prominently displayed at the Commission offices in appropriate locations.
- D. Provide notice of all employment openings other than those filled by promotions from the current staff to the Environmental Justice Task Force (EJTF). SEWRPC will use the EJTF as a resource to assist staff in developing and expanding a list of organizations serving minorities and women to be notified of openings when a search is conducted.
- E. Develop and maintain working relationships with organizations serving professional and/or students of color such as the following, in an effort to develop and recruit diverse candidates for employment;
  - 1. National Society of Black Engineers and Society of Hispanic Engineers, including chapters at Marquette University and the University of Wisconsin-Milwaukee;
  - 2. Other organizations in Milwaukee focused on university students of color, such as the Black Graduate Student Alliance, Black Student Union, and Latino Student Union at UWM;
  - 3. Organizations serving diverse professionals, such as the Hispanic Professionals of Greater Milwaukee, and the Milwaukee African-American and Hispanic Chamber of Commerce; and
  - 4. Relevant national organizations, such as the Conference of Minority Transportation Officials.

The Commission's Director of Administration shall also be responsible for the following activities attendant to the external dissemination of the Commission's affirmative action plan:

- A. The posting of the current affirmative action plan on the Commission's website and the provision of hardcopies of that plan to anyone requesting same.
- B. The inclusion of an equal employment opportunity "tag line" on all job announcements and all media advertisements for employment.
- C. The dissemination of information on job openings which include outside recruitment to women and minority audiences through the selective, appropriate placement of notices of job openings in the following locations and media sources:
  - 1. SEWRPC will place an employment advertisement with one of the following newspapers serving the African American Community:
    - a. Milwaukee Community Journal
    - b. Milwaukee Courier
    - c. Milwaukee Times
  - 2. SEWRPC will place an employment advertisement with one of the following newspapers serving the Hispanic Community:
    - a. El Conquistador
    - b. Spanish Journal
  - 3. SEWRPC will notify the following minority and women's groups and organizations as appropriate for the job posting:
    - a. UMOs Latina Resource Center
    - b. Hmong/American Friendship Association
    - c. Kenosha Racine Urban League
    - d. Spotted Eagle
    - e. Milwaukee Urban League
    - f. The Women's Center
    - g. Family and Women's Resource Center
    - h. YWCA of Southeast Wisconsin
  - 4. SEWRPC will notify the following area technical schools, including technical high schools as appropriate for the job posting:
    - a. Milwaukee Area Technical College
    - b. Gateway Technical College
    - c. Waukesha County Technical College

The Wisconsin technical schools utilize [www.wisconsintechconnect.com](http://www.wisconsintechconnect.com), a website which enables employers to post jobs that will reach all University of Wisconsin Technical School students and alumni.
  - 5. SEWRPC will notify both the University of Wisconsin system colleges and universities and Wisconsin private and independent colleges as appropriate for the job posting:
    - a. The University of Wisconsin system utilizes the Jobs For Wisconsin Graduates website ([www.jobs4wigrads.com](http://www.jobs4wigrads.com)), which enables employers to post jobs that will reach all the UW students and alumni.

- b. Wisconsin's 20 private and independent colleges utilize the [www.wipccc.org](http://www.wipccc.org) website, which enables employers to post jobs that will reach all private and independent college students and alumni.
- c. Out-of-State colleges and universities as appropriate for the position.

Note: Colleges will be requested to post job announcements in the general job placement office and in the college multi-cultural center.

- 6. SEWRPC will also utilize Job Service of Wisconsin.

The Commission is committed to undertake good-faith efforts to contact and make use of recruitment and training services in the Region. Commission staff members are encouraged to refer people of color to apply for possible placement in Commission job vacancies.

## **WORKFORCE ANALYSIS**

The Regional Planning Commission is an areawide planning agency created to carry out an advisory physical development and environmental planning function for the seven county Southeastern Wisconsin Region, consisting of Kenosha, Milwaukee, Ozaukee, Racine, Walworth, Washington, and Waukesha Counties. The Commission relies upon an interdisciplinary staff to ensure that its planning is technically sound and comprehensive. Consequently, the great majority of the Commission staff positions are necessarily filled by individuals with highly specialized knowledge and skills.

The Commission staff may be categorized into four basic classifications – managerial, professional, technical, and clerical. The types of professions or occupations included in these categories are described below:

Managerial and Professional: The Commission managerial and professional staff consists of a chief executive, engineering, planning, natural science, administrative, public involvement and outreach, and information systems managers, civil and environmental engineers, surveyors, urban and regional planners, computer systems administrator, and specialists in biology, geography, economic development, computer user support, and the natural sciences. The staff within these professional disciplines may be even more specialized into such categories as, for example, traffic and transportation engineers, hydrologic and hydraulic engineers, environmental engineers, limnologists, and aquatic ecologists.

Technical: The Commission technical staff consists of drafters, surveying and mapping technicians, and engineering technicians.

Clerical: The Commission clerical staff consists of administrative assistants/secretaries, a bookkeeper, and an office clerk.

In July 2020, the Commission workforce consisted of 67 individuals, including one executive director, one deputy director, and 8 division managers (15 percent), 40 professional staff (60 percent), 12 technical staff (18 percent), and five clerical staff (7 percent). It is common in the managerial, professional, and technical categories for staff members to have advanced degrees and professional licensing. Appendix Figure A.1 identifies how the Commission staff is organized and the racial category of each employee. Employees typically build careers within a Commission operating division. Exceptional employees may be able to further their careers by serving in more than one operating division. Commission executive leadership has been drawn from divisional leadership whenever possible. Where appropriate, the Commission will

continue to fill openings within its managerial staff by promotion from within. Appendix Table A.1 presents a job group analysis of the four job groups defined by the Commission.

The composition of the Commission workforce by gender and employment category as of July 2020, is shown in Table 1. The composition of that same workforce by race and employment category is shown in Table 2. Females comprise 34 percent of the total staff, including 30 percent of the division managers, 27 percent of the professional staff, 42 percent of the technical staff, and 80 percent of the clerical staff. Nonwhites comprise 12 percent of the total staff, including 10 percent of the division managers, 10 percent of the professional staff, 17 percent of the technical staff, and 20 percent of the clerical staff.

Table 3 indicates the distribution of nonwhite Commission employees by employment category and by nonwhite category. One nonwhite individual is in the managerial category, five nonwhite individuals are in the professional category, two non-white individuals are in the technical category, and one non-white individual is in the clerical category. A total of four of the nonwhite employees are Black, one Hispanic, three Asian/Pacific Islander, and one Native American.

**Table 1**  
**Number and Proportion of SEWRPC Employees by Gender and Employment Category: July 2020**

Employment Category	Gender				Total
	Male		Female		
	Number	Percent	Number	Percent	
Managerial	7	70	3	30	10

	Managerial	Professional	Technical	Clerical	
Black	1	1	2	--	4
Hispanic	--	1	--	--	1
Native American	--	--	--	1	1
Asian, Pacific Islander	--	3	--	--	3
Total	1	5	2	1	9

The U.S. Census Bureau makes available a detailed equal opportunity employment file for the years 2006-2010 from the American Community Survey. This file provides civilian labor force data by race and gender for nearly 500 occupational categories. For the purposes of this affirmative action plan, all occupational categories were reviewed as a basis for selecting those Census categories that are believed to most closely mirror the Commission workforce categorical needs. This review concluded that 2006-2010 Census data for civil and environmental engineers, surveyors, cartographers and photogrammetrists, environmental scientists, urban and regional planners, public relations specialists, computer systems administrators and computer support specialists could be combined to represent that portion of the civilian labor force employed in categories similar to the Commission's professional workforce. 2006-2010 Census data for chief executives, and architectural and engineering, natural sciences, public relations, computer and information systems, and administrative managers could be combined to correspond to the Commission's managerial staff. Similarly, 2006-2010 Census data for the categories of drafting occupations, surveying and mapping technicians, and engineering technicians was combined to correspond with the Commission's workforce in the technical category. Finally, 2006-2010 Census data for the categories of secretaries and administrative assistants, office clerks, and bookkeepers, accounting, and auditing clerks could be combined to correspond to the Commission's workforce in the clerical category.

The Commission's reasonable recruitment area is the seven county Southeastern Wisconsin Region as the Commission serves the seven Southeastern Wisconsin Counties of Kenosha, Milwaukee, Ozaukee, Racine, Walworth, Washington, and Waukesha. Therefore, the goal of the Commission is to have its workforce match the availability of females and people of color in the labor force of the seven county Region.

Labor force data were compiled for the seven county Southeastern Wisconsin Region. These data are set forth in the series of tables included as Appendix A. Appendix A also presents labor force data for Milwaukee County for comparison purposes, as Milwaukee County is the county of residence of about three-fourths of the minority labor force in the Region. Tables A.2 through A.5 in Appendix A present labor force data for Southeastern Wisconsin and Milwaukee County for all occupations on the Commission staff by employment category. Tables A.6 through A.9 utilize these occupation data to estimate minority and female labor force availability in Southeastern Wisconsin and Milwaukee County for managerial, professional, technical, and clerical staff categories.

A comparison of the proportion of females in the Commission's workforce with the proportion of females in the labor forces of the Region and Milwaukee County by employment category is set forth in Table 4. The following conclusions may be drawn from this comparison:

- A. In the managerial category (10 employees), the proportion of females in the Commission workforce of 30 percent is higher than the proportion of females in the corresponding labor forces in the Region (29 percent) and less than Milwaukee County (34 percent).
- B. In the professional category (40 employees), the proportion of females in the Commission workforce of 27 percent exceeds the proportion of females in the corresponding labor force in the Region (21 percent) and Milwaukee County (22 percent).
- C. In the technical category (12 employees), the proportion of females in the Commission workforce of 42 percent substantially exceeds the proportion of females in the corresponding labor forces in the Region (12 percent) and is greater than that of Milwaukee County (28 percent).

- D. In the clerical category (5 employees), the proportion of females in the Commission workforce of 80 percent is less than the proportion of females in the corresponding labor force of both the Region (93 percent) and Milwaukee County (91 percent).

In general, female participation in the Commission's workforce closely mirrors female participation in the corresponding labor forces of both the Region and Milwaukee County.

**Table 4**  
**Comparison of the Proportion of Females in the Commission Work Force**  
**with the Proportion of Females in the Corresponding Labor Forces**  
**in Southeastern Wisconsin and Milwaukee County by Employment Category**

Employment Category	Number of Commission Employees	Percent Female		
		Commission	Southeastern Wisconsin <sup>a</sup>	Milwaukee County <sup>b</sup>
Managerial	10	30	29	34
Professional	40	27	21	22
Technical	12	42	12	28
Clerical	5	80	93	91

<sup>a</sup> See Appendix Table A.2 and Tables A.6 through A.9.

<sup>b</sup> See Appendix Table A.3 and Tables A.6 through A.9.

Source: SEWRPC

A comparison of the proportion of nonwhites in the Commission workforce with the proportions of nonwhites in the labor forces of the Region and Milwaukee County by employment category is set forth in Table 5. The following conclusions may be drawn from this comparison:

- A. In the managerial category (10 employees), the proportion of nonwhites in the Commission workforce (10 percent) is slightly less than the proportion of nonwhites in the corresponding labor force of the Region (13 percent), and that of Milwaukee County (29 percent).
- B. In the professional category (40 employees), the proportion of nonwhites in the Commission workforce (13 percent) is slightly less than the proportion of nonwhites in the corresponding labor force of the Region (14 percent), and is greater than the proportion of nonwhites in the corresponding labor force of Milwaukee County (4 percent).
- C. In the technical category (12 employees), the proportion of nonwhites in the Commission workforce (17 percent) substantially exceeds the proportion of nonwhites in the corresponding labor forces of the Region (5 percent) and is slightly less than that of Milwaukee County (20 percent).
- D. In the clerical category (5 employees), the proportion of nonwhites in the Commission workforce (20 percent) exceeds the proportion of nonwhites in the corresponding labor force of the Region (16 percent), and is less than that of Milwaukee County (27 percent).

Overall, the Commission exceeds the Region in the proportion of nonwhites in the technical and clerical workforce categories. The Commission will continue to implement and enhance its activities toward achieving a diverse workforce in all employment categories – managerial, professional, technical, and clerical – as positions become available.

**Table 5**  
**Comparison of the Proportion of Nonwhites in the Commission Work Force**  
**with the Proportion of Nonwhites in the Corresponding Labor Forces in**  
**Southeastern Wisconsin and Milwaukee County by Employment Category**

Employment Category	Number of Commission Employees	Percent Nonwhite <sup>a</sup>		
		Commission	Southeastern Wisconsin <sup>b</sup>	Milwaukee County <sup>c</sup>
Managerial	10	10	13	29
Professional	40	13	14	4
Technical	12	17	5	20
Clerical	5	20	16	27

Note: Tables 4 and 5 include all full-time and part-time employees. Tables A.10 and A.11 in Appendix A present a similar analysis of Commission workforce with full-time employees counted as one employee equivalent to 2,080 working hours in a year, and part-time employees pro-rated to a portion of an employee based upon the number of hours worked in a calendar year. Similar findings and conclusions were reached with this analysis of full-time/part-time data.

<sup>a</sup> Includes Hispanic persons and non-Hispanic persons of other races including Black or African American; Native American, Eskimo, Aleut; and Asian or Pacific Islander.

## PERSONNEL ACTIVITY IN PAST YEAR

The following summarizes Commission personnel activity over the 12-month period of August 2019 through July 2020:

- A. There were ten employment separations during the reporting period. One separation was in the managerial category and consisted of one white male manager. Five separations were in the professional job category and consisted of two white male engineers, one white male planner, one white male specialist, and one white male surveyor. Three separations were in the technical category and consisted of one white female survey and mapping technician, one white male survey and mapping technician, and one black male engineering technician. One separation was in the clerical category and consisted of one black female bookkeeper. Nine of the ten separations were voluntary.
- B. There were nine new hires during the reporting period. One new hire was in the managerial job category and consisted of a white male manager. Five new hires were in the professional job category and consisted of one white male engineer, one white male specialist, one black male specialist, one Asian/Pacific Islander male planner, and one white female planner. Two new hires were in the technical job category and consisted of two white female survey and mapping technicians. One new hire was in the clerical category and consisted of a white female bookkeeper.
- C. There was one promotion during the reporting period. The promotion was within the professional category and consisted of one white female who was promoted from senior specialist position to a principal specialist position. This promotion does not represent the filling of open positions, but rather step advancements consistent with additional education and experience.

## GOALS/CHALLENGES/ACTIVITIES

Based upon the foregoing workforce analysis, the following describes the workforce diversity goals of the Commission, outlines the challenges faced in meeting those goals, and describes activities that the Commission staff will undertake in an effort to move the Commission closer to reaching its goals.

### Employment Diversity Goals

The following represent the Commission employment goals with respect to maintaining existing workforce diversity and increasing that diversity:

- A. With respect to female employment, it is the Commission's goal to maintain female participation in the Commission's workforce that closely mirrors such participation in the corresponding labor forces of the Region.
- B. With respect to nonwhite employment in the technical and clerical workforce categories, it is the Commission's goal to maintain the current proportion of nonwhite participation, which equals or exceeds such participation in the corresponding labor force of the Region.
- C. With respect to nonwhite employment in the managerial and professional workforce category, it is the Commission's goal to increase the current proportion of nonwhite participation in the Commission workforce so that it more closely approaches such participation in the corresponding labor force of the Region.
- D. In addition, the Commission annually compares the female and non-white staff to the female and nonwhite labor force of Milwaukee County for the appropriate employment categories. This comparison shows how the Commission staff compares to the Milwaukee County workforce with respect to females and people of color.

### Challenges/Activities

The following represent the perceived challenges that the Commission faces in meeting its workforce diversity goals, particularly with respect to the nonwhite workforce in the professional and clerical categories. Each challenge is accompanied by a comment as to the activities that would be taken to address those challenges.

#### A. Nonwhite Professionals and Managers

Commission experience has been that it gets relatively few applicants from nonwhite individuals for job openings on its professional staff. This is the challenge faced by the Commission in meeting its workforce diversity goal in the professional category.

The Commission continues to distribute notices of job openings to all of the media and organizations noted earlier in the plan document. In addition, notices of job openings will be provided to an expanded list of minority groups and organizations in the Region, which will include all such groups and organizations in the Region. Also, relationships will be established with minority job placement professionals, and staff will work with the Commission's Public Involvement and Outreach Manager to develop relationships and contacts with groups in communities of color that are able to offer job placement assistance and/or applicant referrals.

The Commission is also strengthening relationships with student chapters of minority professional organizations. To date the Commission has established a relationship with the student chapters of the National Society of Black Engineers and the Society of Hispanic Professional Engineers at

Marquette University. The Commission is expanding those relationships to the University of Wisconsin-Milwaukee and other universities.

A related challenge faced by the Commission is to increase the number of minority individuals that obtain the necessary skills and training to fill professional jobs with the Commission. In the past, the Commission helped fund efforts to build a larger minority group planning/engineering talent pool in Milwaukee under the ENCOMPASS Program, which employed a recruiting specialist. Unfortunately, the funding partners of that program discontinued their support, leaving the Commission as the only partner willing to invest resources in such an effort. Since the demise of the ENCOMPASS Program, the Commission has operated its own minority student work program and will continue to do so indefinitely, finding ways to employ minority students in a manner consistent with their educational needs, goals, and schedules. The Commission's relationships with the Marquette University student chapters of the National Society of Black Engineers and Society of Hispanic Professional Engineers have had some success. In addition the Commission has participated in the Regional Internships in Science and Engineering (RISE) program, which is sponsored by the Milwaukee Metropolitan Sewerage District. This program is available to students who attended high school in the Milwaukee area and have completed 2 years of college. The Commission will continue and attempt to build on these efforts. In addition, the Commission will work with others in finding ways to encourage minority students in the Milwaukee area to enter into professional careers, thus broadening the available talent pool.

Recently, the Commission has participated in efforts by the University of Wisconsin-Milwaukee School of Architecture and Urban Planning, (SARUP) to address the racial diversity of the students in the Urban Planning program of study to reach out to community groups in areas with substantial minority populations to determine ways in which urban planners can better serve those communities, and to promote interest in urban planning as a potential career among students living in those neighborhoods. Commission staff also served on a recent task force of the American Planning Association-Wisconsin (APA-WI) Chapter regarding diversity and equity in planning. The work of this task force included the development of concrete steps for APA-WI to implement to increase diversity in the planning profession.

The Commission intends to continue its participation in similar SARUP activities to promote urban planning as a career for communities of color.

**B. Office Location and Transit Service**

The Commission has obtained office space in The Global Water Center office building located in the City of Milwaukee. This office is accessible by public transportation. SEWRPC staffs the office with one to two persons each day who work on specific projects. It is the intent to staff the office full time; however, this does not involve any one staff member having his or her office there full time.

The transit services available at the time the Commission moved to its current primary work place in the Waukesha area were terminated by Waukesha County in 2006. Today 43 percent of Commission employees commute from Milwaukee County residences. The Commission has long recommended in its plans, and advocates strongly for improved transit service to job centers throughout the Region. The Commission has identified the severe transit funding problems in the Region, and the need for dedicated funding. Implementation of the Commission's regional transit plans would provide reasonable transit access to the Commission's present primary office location.

## **MONITORING AND UPDATING**

As noted earlier in this plan document, the Commission has designated its Director of Administration as the individual primarily responsible for administering the Commission's equal employment opportunity policies and attendant action program. Toward this end, the Director of Administration is charged with maintaining appropriate files relating to the affirmative action plan, including logs pertaining to job applicants, hiring, promotions, and terminations. The Director of Administration will, to the extent possible given the reluctance of individuals to provide certain information, attempt to monitor job applicant flow by gender and racial status. The Director of Administration will maintain a log of personnel activity by race and gender for each advertised job over each ensuing year. Such data will be retained on file for a period of three years.

This affirmative action plan will be updated in July each year. This will consist of an update of the workforce analysis, together with comments relative to progress in reaching the Commission's diversity employment goals, changes in those goals as may be appropriate, and any desirable modifications to activities.
